

Your Success. Our Commitment.

Ascella Technologies, Inc. (Ascella) was founded in 2002 with the mission to deliver value-added services and technology-based solutions that generate real results for Federal Government agencies. Ascella is a CMMI Level 3 appraised, ISO 9001:2015 certified, minority owned, Small Business that has supported Federal agencies on numerous solution/system implementation and support projects. For over 15 years, Ascella has provided a wide range of financial management, accounting, system, data analytics, optimization, Agile, and IT support services to various Federal agencies. **With Ascella, “Your Success is Our Commitment”.**

Financial Management Solutions

Our Financial Management expertise is honed by years of implementing solutions using Oracle E-Business, CGI Momentum, and SAP software.

Agile Transformation Services

Our industry-certified Agile and Scaled Agile (SAFe) digital transformation consultants take a pragmatic approach towards helping you navigate to a path of business agility in a manner that ensures that your transition to Scrum, Lean or Kanban is achievable and ultimately sustainable.

Business Process Optimization

We work with our clients to review process and system workflows to maximize efficiencies and reduce costs. We leverage Microsoft cloud platforms, including SharePoint and Office 365, as well as Robotic Process Automation (RPA) to develop and implement automation and optimization solutions.

Enterprise Costing & Analysis

Our experts leverage rigorous financial management practices and costing solutions such as SAP Profitability and Cost Management (PCM) to model the flow of complex financial data and help agencies better understand the relationship between resource consumption and the outputs or outcomes.

Business Intelligence & Data Analytics

We live and breathe data and are data crunchers, analyzers, and reconcilers by heart. From data management architecture and planning, to business intelligence, operational and dashboard reporting, we extract actionable information out of data and enable organizations to manage operations to desired outcomes.

Software Engineering

Our team of expert engineers and analysts focus on developing deep understanding of our client business requirements and apply Agile and DevOps development practices to build and deploy systems using open source or proprietary development platforms.

Project & Program Management

We focus on "substantive" program management, applying deep agency and domain subject matter expertise, along with analytical thinking and experience honed by implementing and delivering large scale IT solutions.

Cloud Collaboration Services

Our expert engineers leverage Microsoft cloud platforms, including SharePoint and Office 365, to automate business processes, support knowledge management, and foster collaboration across the organization.

IT Infrastructure & Cloud Services

We take a disciplined, repeatable approach to delivering IT infrastructure and security support services to ensure that risks are identified and mitigated, implementations are delivered on schedule, and costs are contained. We apply our system architecture analysis and operations expertise to support FISMA and Risk Management Framework (RMF) compliance activities.
