GovCycle®

Why GovCycle?

Create and Maintain Operating Plans

Create, distribute, and consolidate budget data calls for every office in your agency in minutes inside a single, easy-to-use module. Instantly pull in last year's data to save time, and utilize configurable workflows to ensure approvals and routing are simple, seamless, and traceable.

Create Your Congressional Justification

Issue requests to offices, import and update budget tables directly from GovCycle, and collaboratively draft and edit your agency's budget book all within a single module. You can save and reuse sections with the section library, and click and drag sections to make changes. Once you're finished, export to Word or PDF with the click of a button.

Execute Your Budget

Distribute funds with confidence in a GovCycle module that is tightly integrated with your agency's approved operating plan. When needs change, allow offices to request funds transfers using configurable workflows that allow for dynamic approval thresholds.

Conduct What-If Analysis

Enjoy full control over your budget with GovCycle's powerful What-If Analysis. Easily generate and manage hypothetical scenarios of anticipated budget requests based on configurable pricing factors, or monitor the impact of funds transfers on reprogramming thresholds before they occur.

Product Features

- ✓ Interfaces with leading federal financial systems, including Momentum, SAP, and Oracle Federal Financials
- ✓ Integrated security and role-based permissions
- ✓ Robust reporting and data visualizations for all budget data
- ✓ Supports DATA Act reporting and cost allocations
